Mrs. Erma Grant

Throughout our lives there are many factors which influence people. How fortunate we are to have someone who has a genuine interest in all Poly High School students. One who instills a desire for learning, who is patient with our weaknesses and inspires us to reach goals we never thought possible — this is Mrs. Erma Grant, affectionately known as "Mother Grant." To you, we dedicate this book, for your never ending devotion and loyalty to the people of Polytechnic High School.

With admiration and respect,

STUDENT LIFE

Pride is different things to different people. For some
it is studying extra hard to make **good grades**
taking advantage of the academic level their

school offers. For others it's just managing to remember what books to take to which class and beating the good old tardy bell.

FRIENDSHIP

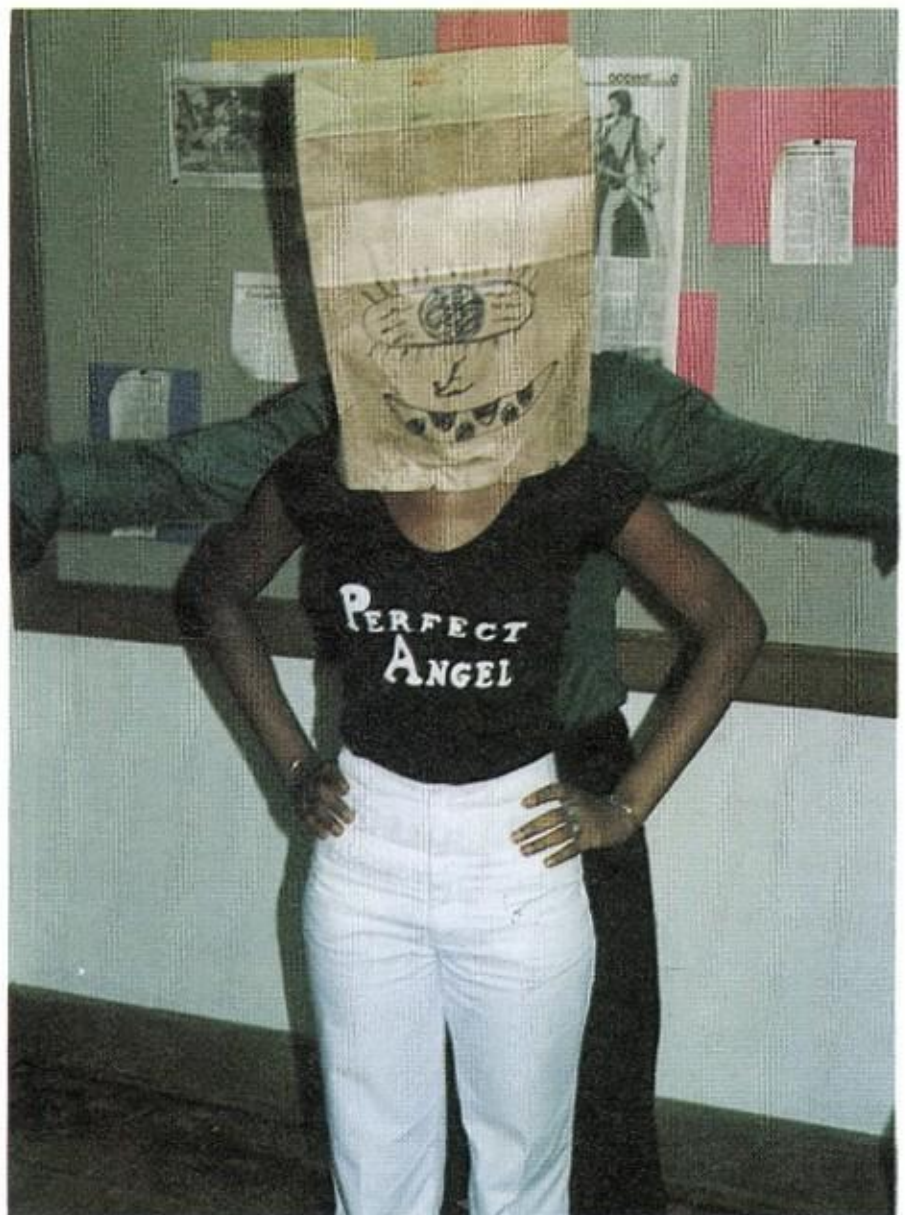

A friend is someone who cheers
us up when we are down;
A friend is someone we like
being around;
A friend is one who has taught
us right from wrong;
A friend is one who helps us
when we are weak, to be strong.

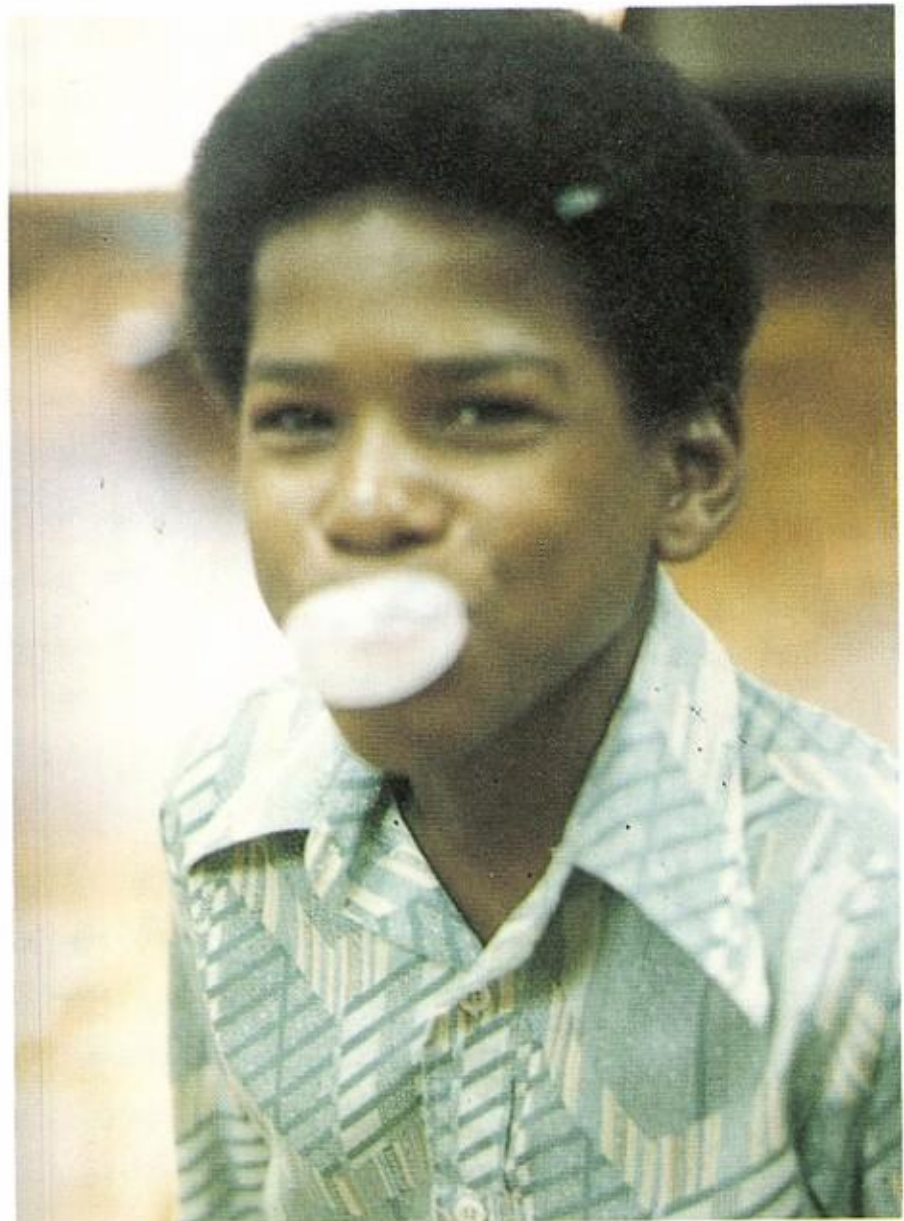

We receive two types of education at school — academic and social, each as important as the other. We find time to interact with others. Specialized friendships are just as vital.

Relationships in which we can

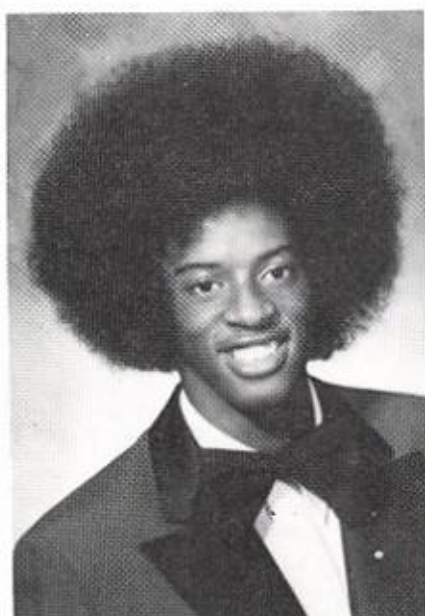

talk and share on a one to one basis. This strengthens and helps us grow more independent. If the individuals who serve as the basis for the system are strong, then the end result will be lasting.

Unity Makes Poly

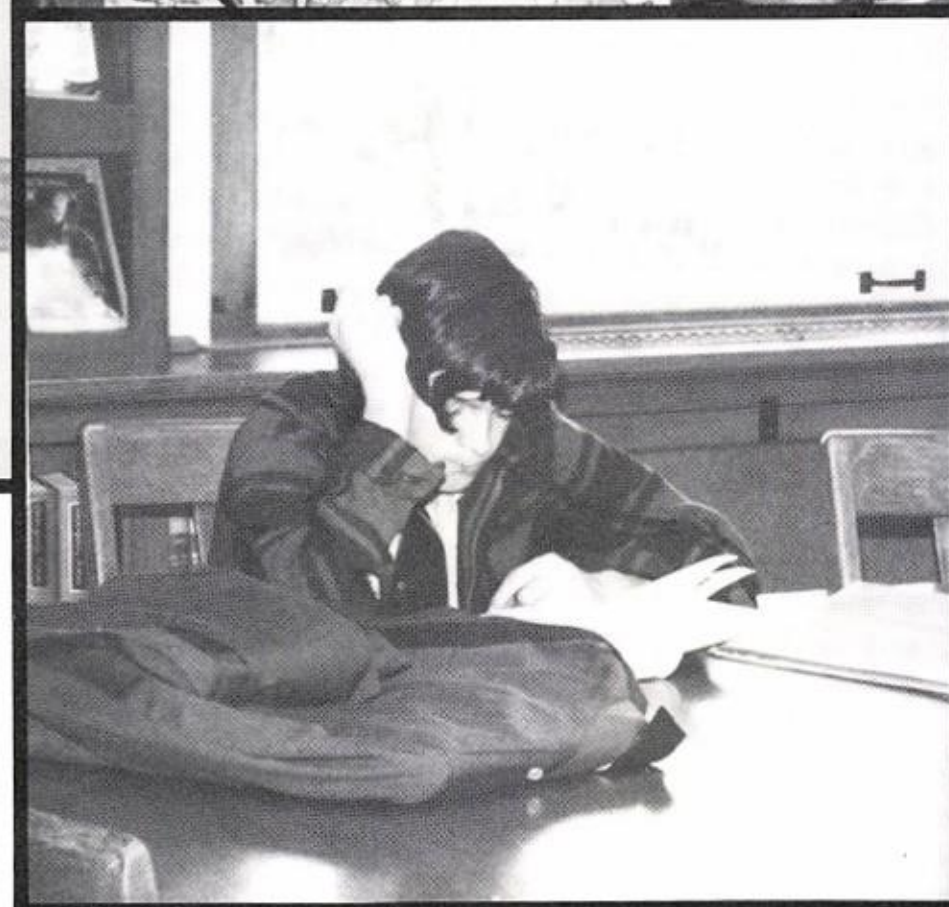

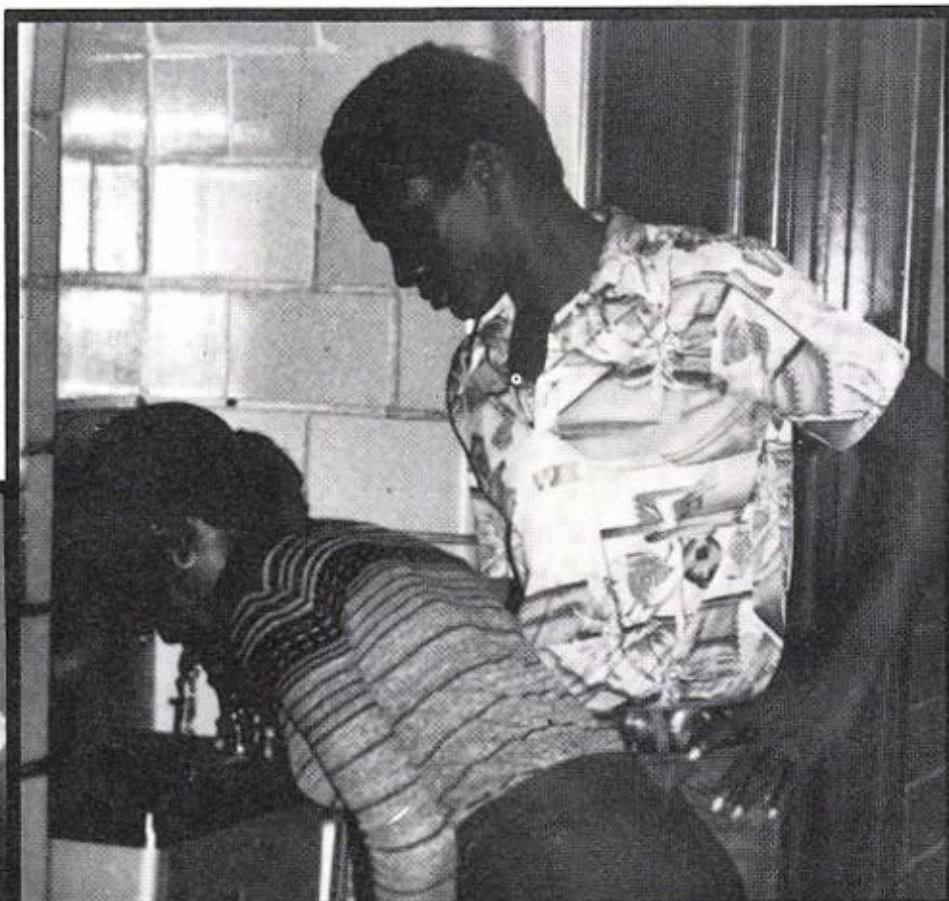

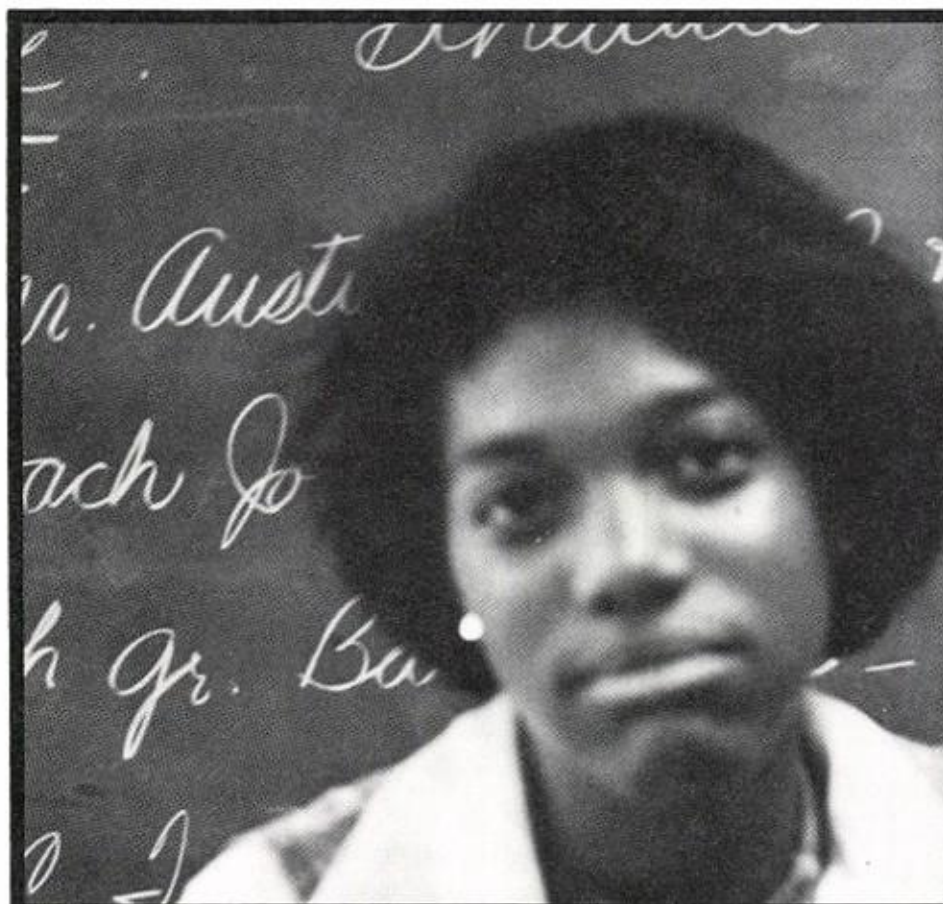

It takes many things to make a football season. The team gave its all in trying to make Poly a winner. Also, it received enthusiastic support from the band, the pep squad, the cheerleaders, and the student body. And though the score was often disappointing, they never failed in their support. It is this unity that makes Poly strong.

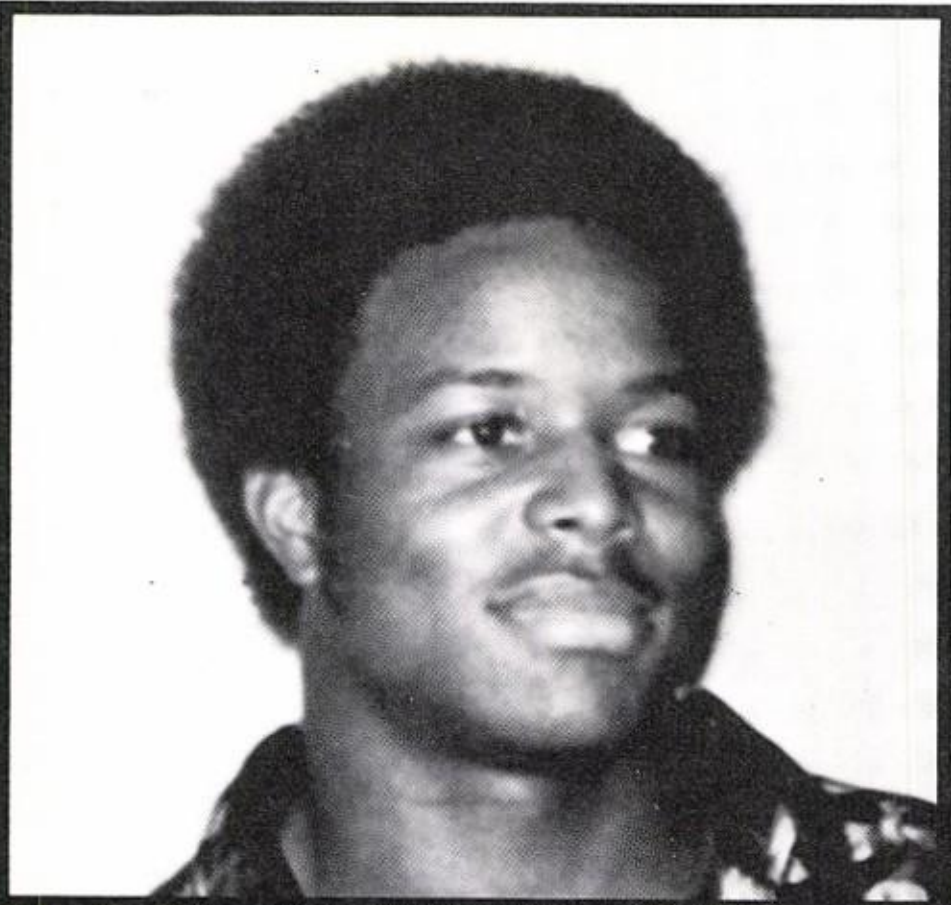

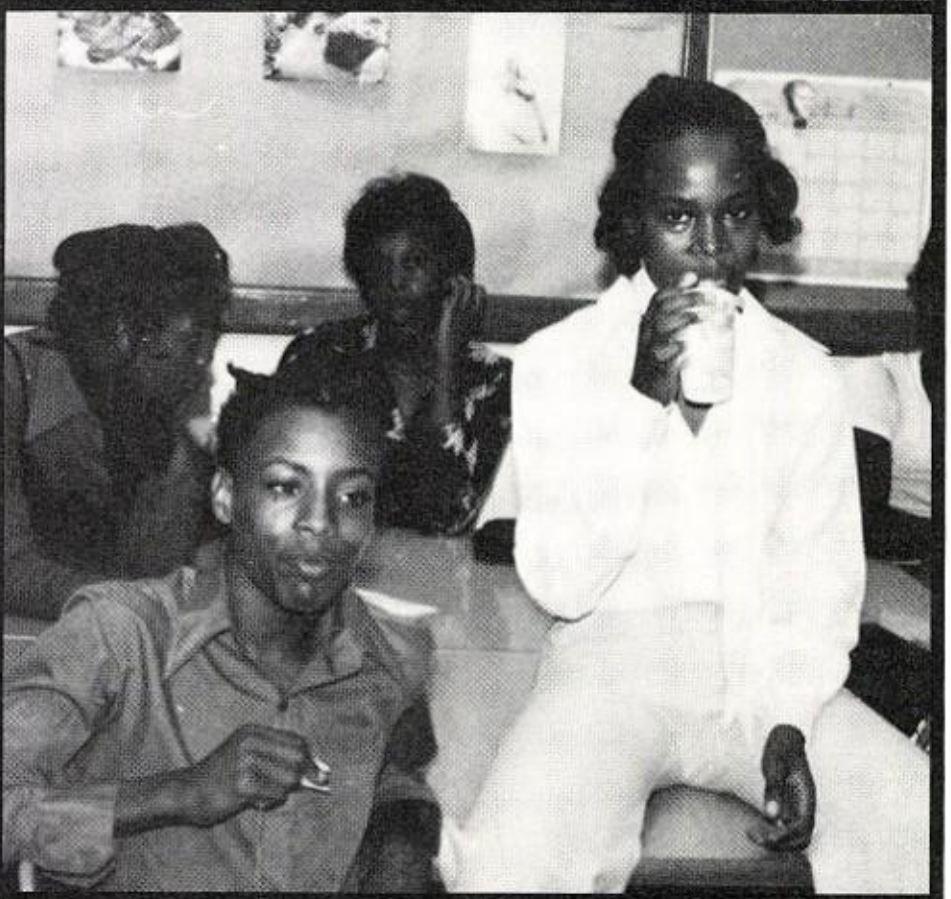

Poly People

The Parrot staff names this section Poly People. A composite of the faces shown on these four pages would be a good representation of the typical Poly student.

ORGANIZATIONS

Student Council Works For The Betterment Of Polytechnic High

The Student Council of Polytechnic High School is a group of leading students. They were elected by their classmates to act, along with the administration, as the governing body of the school. They were chosen to represent the student body in working out problems, together with the faculty, for a common cause.

Student Council Officers

Timothy Hardeman, Vice-President; Sherry Brennan, Treasurer; Larry Johnson, President; Terrie Reed, Secretary; Robert Bankston, Parliamentarian.

THOSE WE CHEERED

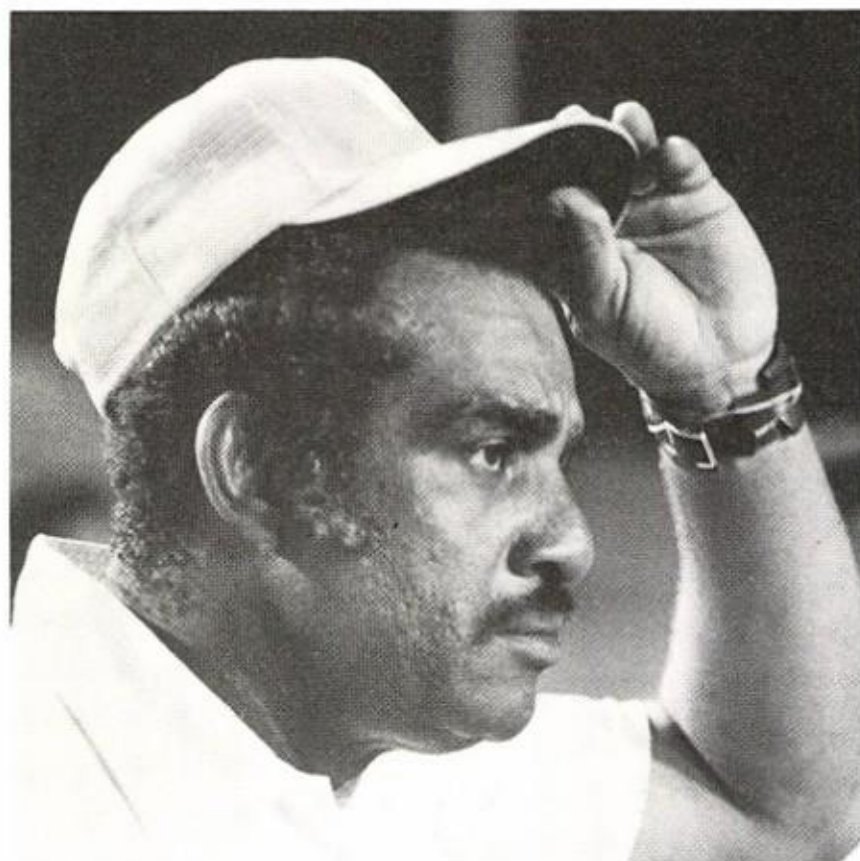

Athletics

Poly Football

The 1977 version of Poly football never really reached its potential. Our team played to its maximum effort only to find, when tired or injured, there was no reserve for replacement. It became very evident each third and fourth quarters that our team became fatigued and our opponents were able (only in the fourth quarter of most of our games) to build a large score against us.

Our lessons learned are of great value. Since the 1977 season ended, our prospectus for 1978 is a very different story — a vast improvement of attitudes, knowledge, tenacity and team loyalty have emerged as our strong points.

THOSE WHO TAUGHT US

Administration
And
Faculty

Mr. Knox J. Tucker

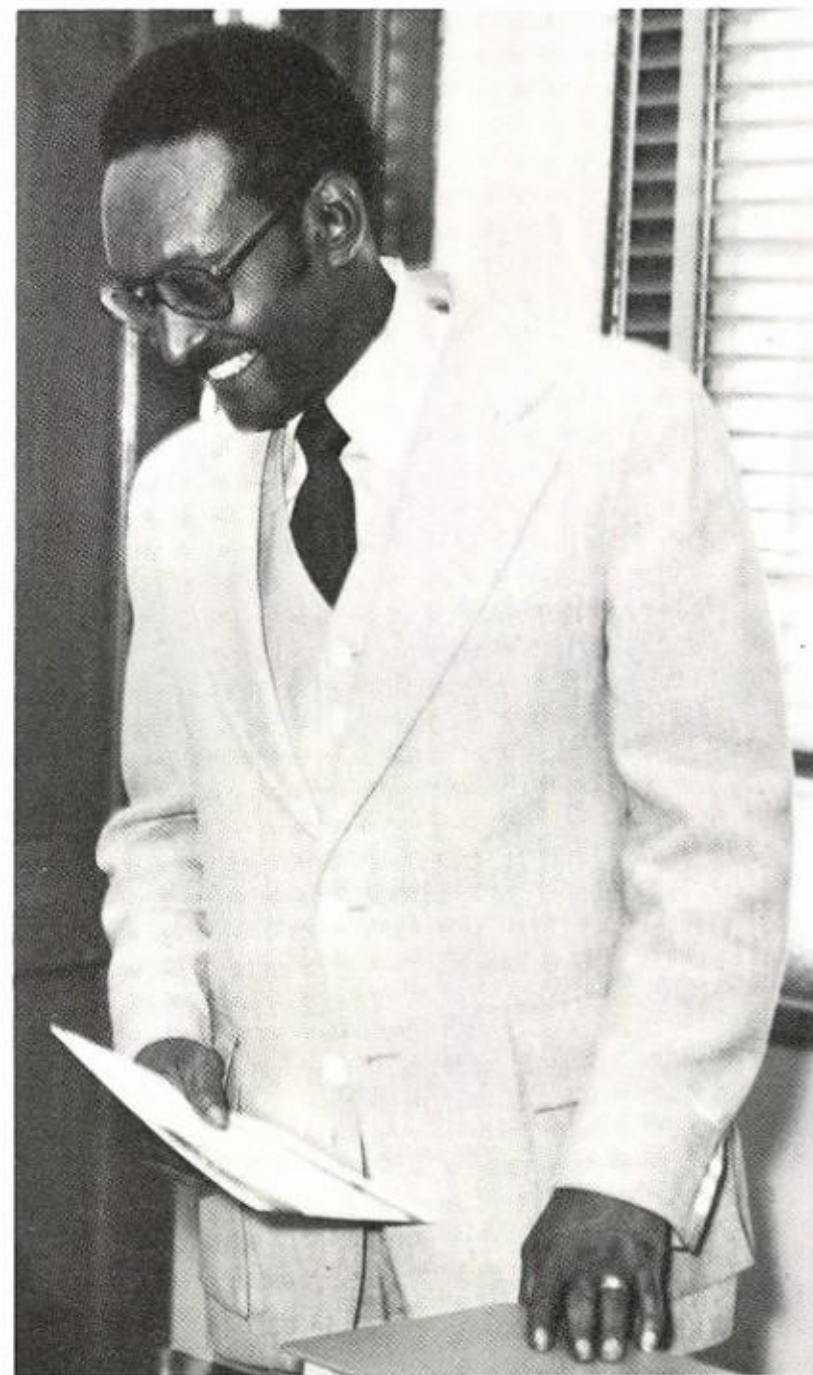

Principal

One of the pleasures of being principal of Polytechnic High School is that of knowing and working with students.

And one of my greatest desires is to see every child achieve academic excellence while under the auspices of our school.

This has been a banner year in many areas of our school life, and we are looking forward to achieving even greater heights at Polytechnic High School.

— Knox J. Tucker

English

English teachers seek to make knowledgeable to their students the art of communication — speaking, listening, reading, and writing — in such a way that the study of English might be a pleasurable experience and a productive skill, not only for college, but also for a fruitful life in the social and occupational world.

Science

Science is a search for truth which involves a very definite period. In high school we try to emphasize the method; the thought process of applying known facts to a new situation. In devising a solution to the problem, we try to show that this process is applicable to the everyday problems of life.

We strive for these goals:
competence in basic skills and
processes, ability to apply skills
to practical problem-solving, and
understanding of the
significance and beauty of
mathematics.

Our minds are filled with memories of what this school has meant to us. We look back with fond appreciation.

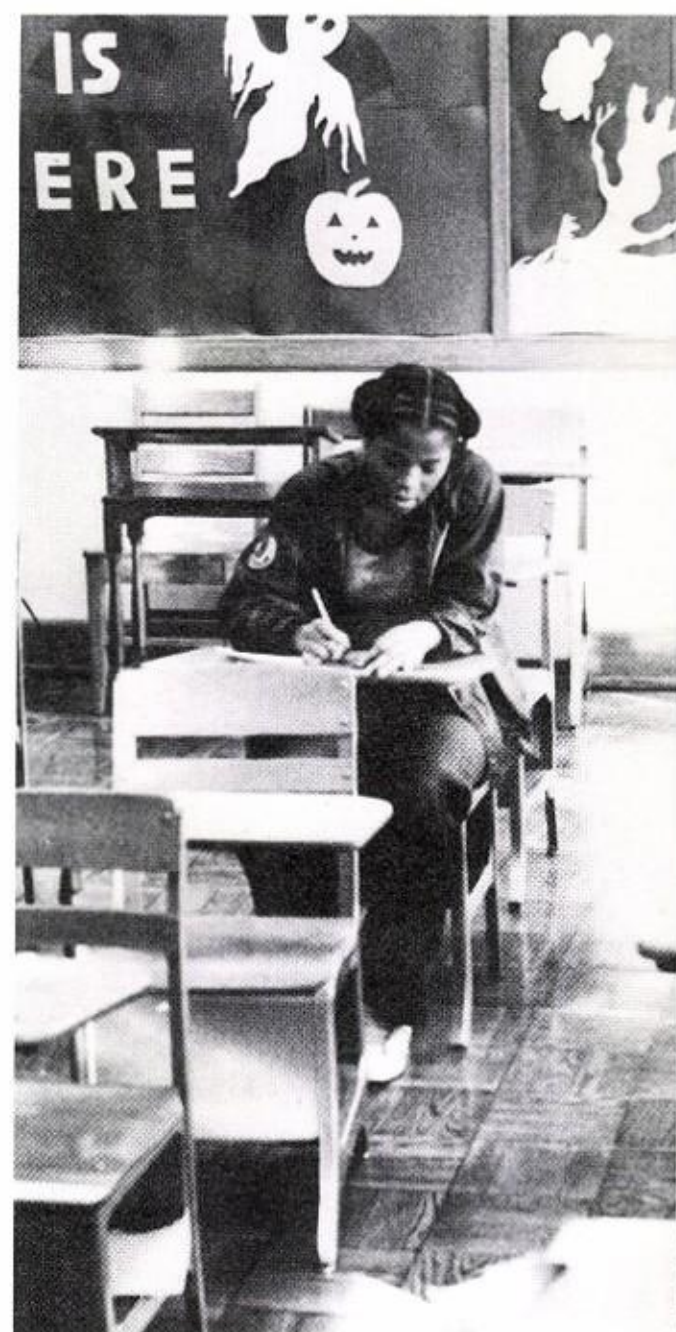

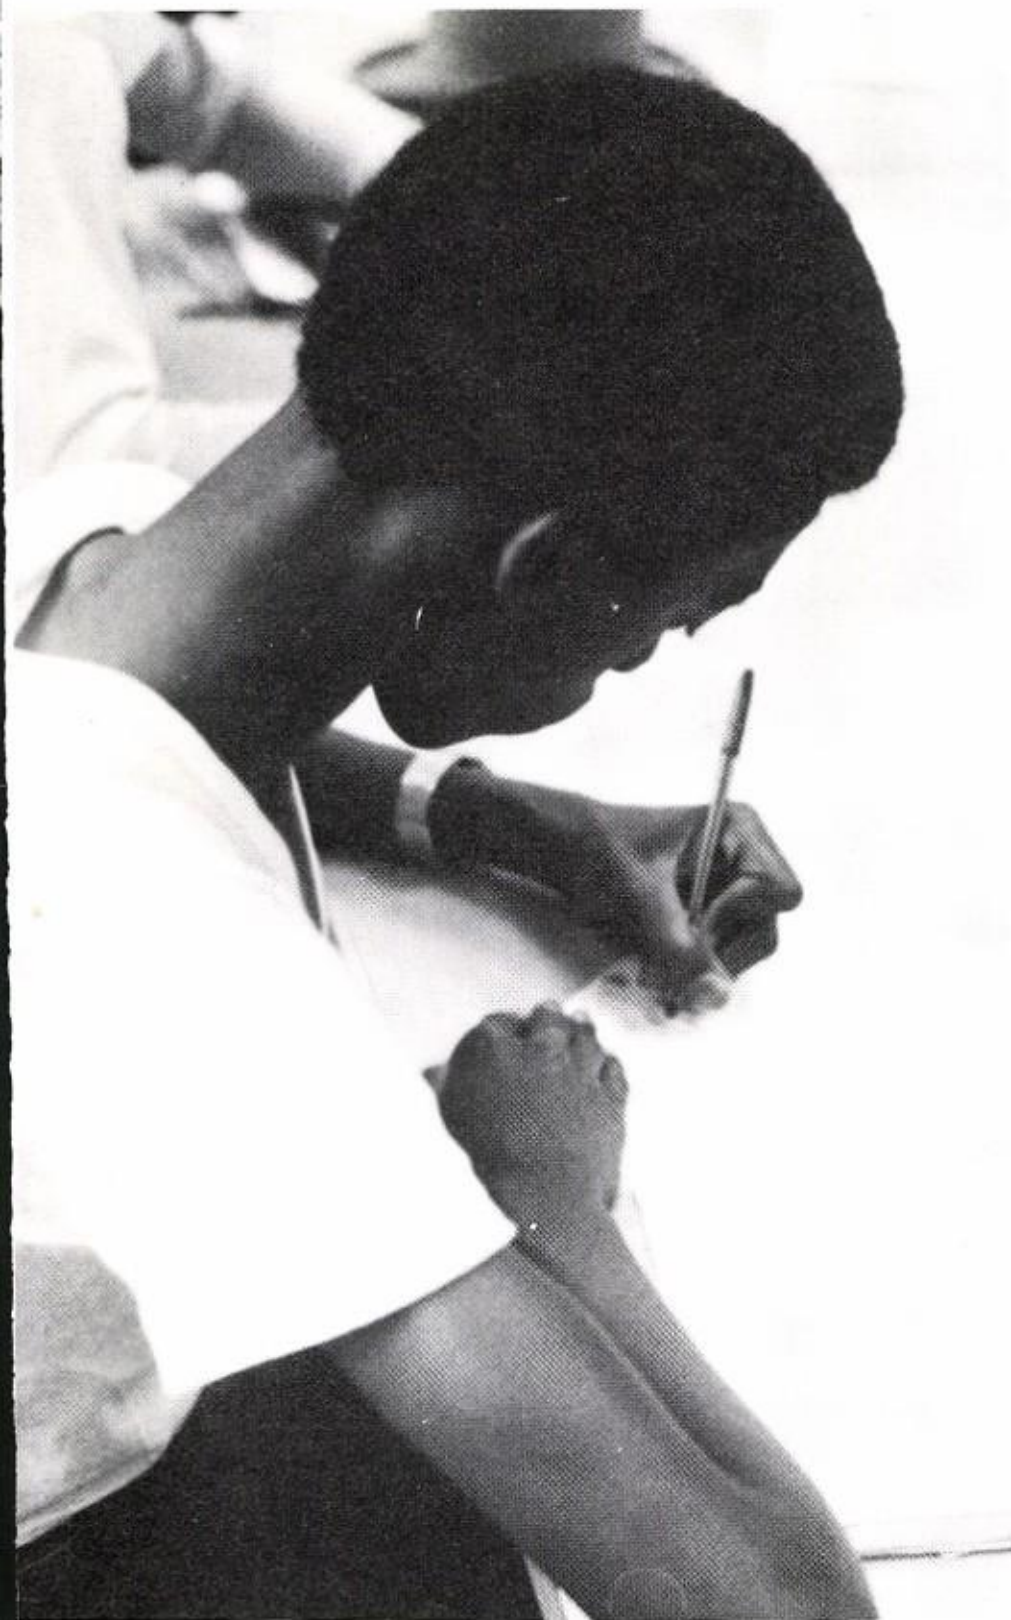

We appreciate the many friends and the help, the joy and laughter they have brought us.

**We appreciate the teachers.
Without their help and understanding
we never could have made it. They
encouraged us when we faltered, and
praised our accomplishments.**

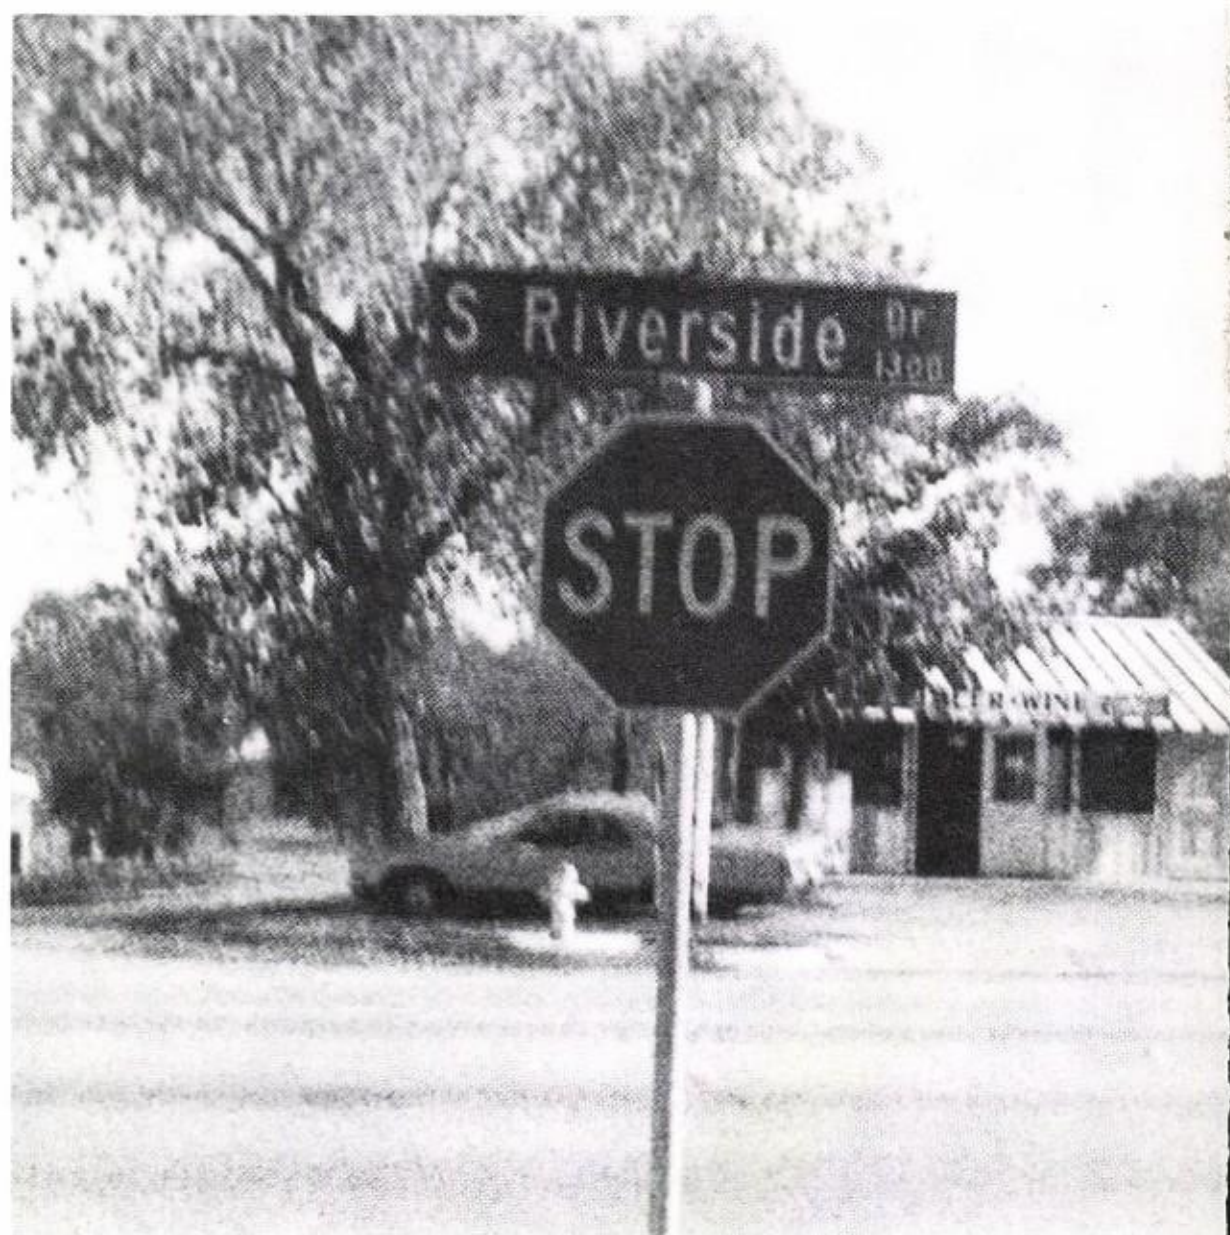

In a great part, our friends
and teachers are
responsible for what we
have become. In a sense,
we are images of these
people or a reflection of
them.

Any success we may attain in life will be due, to a great extent, to the influence these friends and teachers have had on us. For this we are deeply appreciative.

To Mr Richard Rose
You are indeed a very
sweet young man with
a beautiful and inspiring
attitude and personality
There will always be
a special place in
my heart for you
God Bless

To Richard

A very nice young
man I still love you
no matter what I is sorry
and I will always love you
I will always love you

Yours Truly
